## EXPERIENCE

### MaDr Cloud Development | Full-stack Web Developer

Jan 2022 - Present | Phoenix, AZ

- Core understanding of HTML, CSS, JavaScript & TypeScript.
- Setting-up, developing within, & managing a variety of Linux environments including Fedora, OpenSUSE, & Ubuntu.
- Deploying & connecting both local and cloud SQL & NoSQL databases for a variety of applications. Generally reaching for MongoDB(NoSQL), PlanetScale(MySQL), or Dockerized PostgreSQL instances.
- Using Prisma for object relational mapping & query building.
- Experienced with Node and Express; MERN stack, as well as employing backends-as-service using modern platforms like Vercel & Netlify.
- Building RESTful APIs, CRUD, and testing them with tools like Postman and DBeaver.
- Implementing tRPC in Next.js apps as I push towards end-to-end typesafety.
- Using Vercel's ecosystem to set up rate-limiting with Upstash & error-logging with Axiom.
- Developing user interfaces in React & Svelte, in frameworks like Next.js, SvelteKit, & Astro.
- Using OpenAI's API to develop apps that integrate and make use of modern AI models.
- Leveraging AI in my personal workflow to speed up efficiency and productivity. Strong query formulation skills.
